

For my final project, I will create a webpage that is meant to display standings and statistics about each Major League Baseball team. Each team will be sorted by the number of games behind the leader in their league. On the site, you can see each team’s wins, losses, how many games behind they are from first place, run +/- differential, divisional rank, along with the date the site was last updated. I plan to use React, Tailwind, and Supabase to help me complete this task.

| Major league 2024 American League and National League Standings |      |      |      |      |      |      |      |
|---|------|------|------|------|------|------|------|
| American  |      |      |      |      |      |      |      |
| Team  | info | info | info | info | info | info | info |
| Team  |      |      |      |      |      |      |      |
| Team  |      |      |      |      |      |      |      |
| Team  |      |      |      |      |      |      |      |
| Team  |      |      |      |      |      |      |      |
| Team  |      |      |      |      |      |      |      |
| National  |      |      |      |      |      |      |      |
